

## Fire Safety

---

Our Fire Safety training course is designed to empower participants to prevent, identify, and manage fire hazards effectively. Throughout the course, our experienced trainers will guide you through essential principles such as fire alarms, causes of fire, evacuation, and emergency protocols. You will also develop skills to assess risks and devise effective mitigation strategies.

By the end of the course, learners will have the knowledge and skills to confidently identify hazards, implement preventive measures, and respond adeptly in emergencies.

## Learning Outcomes

- Understand the causes of fire
- Describe the fire triangle
- Take action to prevent fire from starting
- Describe fire procedures and equipment
- Understanding reporting and action procedures
- Describe the role of the fire warden

## Course Content

### **Module 1: The Fire Triangle and different classes of fire:**

- Fires are classified into different categories based on the type of fuel involved. Class A fires involve ordinary combustible materials such as wood, paper, and cloth. Class B fires involve flammable liquids like gasoline, oil, and grease, Class C fires involve flammable gases, Class D fires involve combustible metals and Class F fires involve cooking oils and fats commonly found in kitchens. Understanding these classifications is crucial for selecting the appropriate response tactics to effectively combat each type of fire.

### **Module 2: Fire Prevention:**

- Learning about fire prevention is essential to ensure safety in both residential and commercial environments. Learn to identify potential fire hazards, how to implement safety measures, and how to practice fire safety protocols.

## Course Content

### **Module 3: Fire Safety:**

- Understanding the importance of PAT testing, how to prevent accumulation of fuels and how to enforce a no smoking policy. Understand the rules around the siting of fire alarms, extinguishers and regular maintenance.

### **Module 4: Fire Evacuation Procedures:**

- What to do if you discover a fire. Learn the evacuation procedures for your premises and understand the factors that might make it hard for someone to evacuate safely.

### **Module 5: Fire Reporting, Training and the role of the warden:**

- Understanding the importance of an Accident/Incident Report Form. Learn the responsibilities of a Fire Warden/Fire Marshal and know when and how to call the emergency services. Understand the importance of regular fire drills.
